

FLY AWAY LADY BUG

Here's an easy-to-make windsock you can hang out to play on an extra-breezy day!

What you need:

- Empty round oatmeal container
- Black and red craft foam
- Craft glue
- Pair of wiggle eyes
- Ribbon
- String or elastic cord (available at craft stores)
- Hole punch
- Scissors

What you do:

- 1** Remove the lid and bottom from the oatmeal container.
- 2** Cut a piece of black craft foam large enough to cover the outside of the container. Wrap it around the container and glue it in place.

3

For the wings: Cut a 9" circle from the red craft foam. Cut the circle in half and glue each piece to the container, as shown. Cut small black craft-foam circles and glue on to make spots.

4

For the head: Cut a half-circle from black craft foam about 4" wide and glue it to the top of the container, as shown. Glue on the wiggle eyes.

5

Cut the ribbon into strips about 24" long and glue them inside the bottom end of the container.

6

To hang your windsock: Punch four evenly spaced holes around the top of the container. At each hole, thread and knot a piece of string or elastic cord. Then tie the loose ends together in a knot at the top.
